CONDROSENGKOLO

SERIES

Iwan Tirta Private Collection presents the harmonious story of human and the universe in Condrosengkolo.

Condrosengkolo is a Javanese traditional time configuration based on the moon rotation, which can also be found in other cultures in Indonesia. Condrosengkolo is a symbol of numbers that represents the year. Believed as the character of the year, these symbol are used to manage the time frame and the activities for making the best products, ensuring that these activities would find harmonious balance with the universe.

The philosophy of Condrosengkolo is translated into the glass fragments composition by VeNUS Art Mosaic combined with diverse colors as the manifestation of light in the universe.
